Visibility Issues	# of Issues
<p>0 pages were blocked by robots.txt</p> <p>A robots.txt file permits or restricts access to your website by search engine robots that crawl the web. These bots are automated, and before they access your website, they check to see if the robots.txt file blocks them from accessing certain pages.</p>	0
<p>0 pages have redirects</p> <p>Redirects are used for pages, folders and domains that have moved. Search engines recommend using 301 redirects for content that has been permanently moved. However, other types of redirects may be appropriate for the changes you're making to your site.</p>	0
<p>0 page errors were detected</p> <p>A page server error indicates a problem with your website's hosting provider delivering a page to a search engine robot. This can be caused by problems with the code on the page or problems with the hosting server.</p>	0
<p>No malware found</p> <p>Kinds of malware include (but are not limited to) viruses, worms, spyware, and Trojan horses. Once a site or computer has been compromised, it can be used to host malicious content such as phishing sites (sites designed to trick users into parting with personal and credit card information).</p>	0
